

Component Spotlight

Complex Patient Escalation List component

About the component:

The Complex Patient Escalation List identifies the inpatients who have been escalated from the Complex Patient Register as they require complex resolutions and input from the executive management teams.

This component details the current inpatients who require executive decisions and case management to facilitate discharge.

Who it's for: Administration, Clinical Nurse/Shift Coordinator, Clinical Specialists – Allied Health, Nursing, Medical, Bed Manager, Clinical and Non-Clinical Department Managers, Nurse Unit Managers – Inpatients, Business Managers, Project Officers/Service Improvement

Where you'll find it:

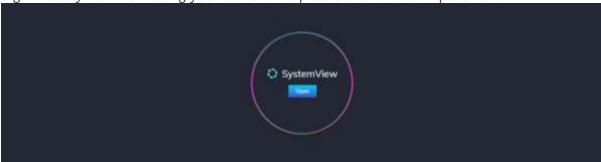

SystemView > Explore >Beds > Complex Patient > Complex Patient Escalation List

Data refresh rates:

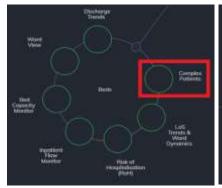

The data within this component updates Occurs 7 days a week, 24 hours a day, every 5 minutes

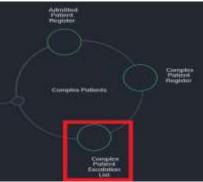

Step 1.

Sign in to SystemView using your current hospital credentials and password

Step 2.

Navigate to Explore > Beds> Complex Patients> Complex Patient Escalation List

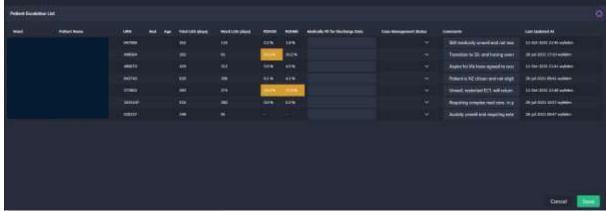

Step 3.

Apply filters at the top of the page to target your analysis.

Note: Patients shown defaults to 30. To see all patients select all under Patients Shows

Step 4.

Complex Patient Escalation List identifies and escalates, complex patients.

This allows for the opportunity to pre-emptively adopt strategies and minimise the barriers to discharge for the patient.

Data can be filtered to look at anticipated discharge timeframe and location, as well as any complex discharge reasons.
