Component Spotlight

Elective Schedule Monitor component

About the component:
This component allows end users to monitor the level of booking completeness for each theatre session over the next 6 weeks (updated hourly) and provides suggested options for each session regarding the next patient to book into each session. Thus, this component can help proactively increase theatre utilisation by increasing the booked theatre times, and also improve chronological management by encouraging bookings from the back of the elective surgery waiting list.

Who it's for: Bookings and Scheduling Officers, Elective Surgery Coordinators, Department Managers and Clinicians/ Surgeons..
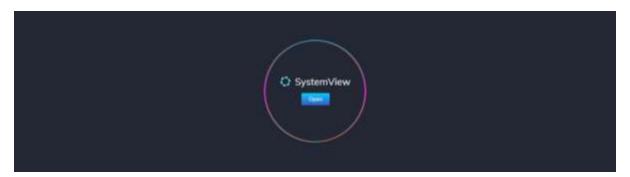

Where you'll find it:
SystemView > Explore > Surgery > Elective Schedule Monitor.
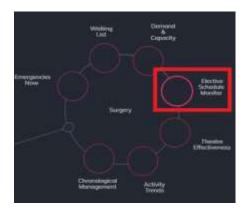

Data refresh rates:
The data within this component updates hourly.

Step 1.

Sign in to SystemView using your current hospital credentials and password

Step 2.

Navigate to Explore > Surgery
> Elective Schedule Monitor.

Step 3.

Apply drop-down filters **at the top of the page to refine the data.**
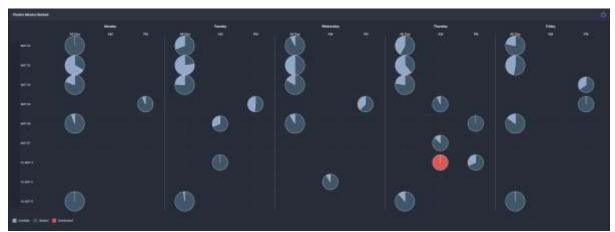

Step 4.

Total Theatre Minutes Booked Next 6 Weeks chart provides an aggregated and prospective view for the current and next 5 weeks of theatre minutes within all available theatre allocations.
This view provides a quick display of remaining available minutes.

Selecting a week will open a detailed weekly view of theatre bookings.

Theatre Minutes Booked chart provides a weekly view of individual theatre sessions by day. This visualisation shows overbooked minutes and sessions with remaining time.

Selecting a session with available minutes will open a list of potential bookings to maximise theatre usage.

Session Booking Details table (opens when a session is selected) shows patients that are currently booked with suggestions of other patients to potentially book as follows:
Elective Patients Within 6 Weeks of Target Treatment With Potential Estimated Fit Within the Session and
Patients Within 6 Weeks of target Treatment With Longer Procedures.

Session Booking Details table updates hourly as patients are booked into the source system, and the **Potential Waiting List** updates daily.
